

WEBVTT

1

00:00:00.000 --> 00:00:00.510

Dusty Gedge: All right.

2

00:00:03.000 --> 00:00:04.529

Dusty Gedge: yeah so this building here.

3

00:00:04.740 --> 00:00:11.099

Dusty Gedge: we're gonna do that it's got to green rooms there, which is not very good yeah little green roofs there, which is not very good.

4

00:00:14.280 --> 00:00:17.460

Dusty Gedge: So that roof, and where where they.

5

00:00:18.539 --> 00:00:23.100

Dusty Gedge: Are these yeah these look like they were built maybe before the wall.

6

00:00:23.700 --> 00:00:24.120

yeah.

7

00:00:25.680 --> 00:00:26.400

Dusty Gedge: So.

8

00:00:27.900 --> 00:00:29.820

Dusty Gedge: yeah we can they were built for the wall.

9

00:00:32.370 --> 00:00:36.510

Ariyana Rayatt: That was, I think, in a green wall on the face of these buildings as well this.

10

00:00:36.540 --> 00:00:36.840

yep.

11

00:00:38.520 --> 00:00:38.940

Ariyana Rayatt: yeah.

12

00:00:42.690 --> 00:00:43.050

Dusty Gedge: yeah.

13

00:00:46.320 --> 00:00:47.070

Dusty Gedge: street level.

14

00:00:54.150 --> 00:00:56.610

Dusty Gedge: yeah yeah yeah.

15

00:00:58.380 --> 00:01:01.290

Dusty Gedge: So what you could do is especially for the scene.

16

00:01:04.860 --> 00:01:05.370

Dusty Gedge: jam.

17

00:01:09.870 --> 00:01:10.140

Dusty Gedge: jam.

18

00:01:11.550 --> 00:01:13.080

Dusty Gedge: So what you could do is start to.

19

00:01:14.430 --> 00:01:20.640

Dusty Gedge: Think about how you could get what you basically put a little groove in into this abstained.

20

00:01:22.350 --> 00:01:24.900

Dusty Gedge: And then the green walk and have another tank behind it.

21

00:01:25.920 --> 00:01:28.200

Dusty Gedge: which could take the rain water to irrigate and green wall.

22

00:01:28.680 --> 00:01:29.040

Ariyana Rayatt: yeah.

23

00:01:29.400 --> 00:01:32.550

Dusty Gedge: And if you just go bestiary green wall on the bridge.

24

00:01:34.530 --> 00:01:39.180

Dusty Gedge: that's one which does that Okay, which we design years ago.

25

00:01:40.620 --> 00:01:45.270

Dusty Gedge: So that's always good to join us very water to irrigate yeah.

26

00:01:47.100 --> 00:01:50.670

Dusty Gedge: Oh, these waves can be great spot you really can't.

27

00:01:53.010 --> 00:01:53.430

Dusty Gedge: Go.

28

00:01:55.320 --> 00:01:56.250

Dusty Gedge: Back to.

29

00:01:57.840 --> 00:02:01.320

Dusty Gedge: back to where you are with visionaries everything.

30

00:02:02.880 --> 00:02:03.690

Dusty Gedge: So yeah.

31

00:02:06.810 --> 00:02:12.960

Dusty Gedge: I think they're pre war that might be knowing 10s 20s so that's about it really.

32

00:02:14.130 --> 00:02:18.210

Dusty Gedge: yeah yeah but you could have a really nice rain garden here, you know.

33

00:02:19.320 --> 00:02:19.560

Dusty Gedge: yeah.

34

00:02:23.400 --> 00:02:26.880

Ariyana Rayatt: species that you plan on the.

35

00:02:29.520 --> 00:02:35.400

Ariyana Rayatt: rate reform war is it mostly native or how you go about deciding what species department.

36

00:02:39.090 --> 00:02:48.360

Dusty Gedge: Well, I would go, we have to London living rooms makes all the living rooms makes and you'd mix the living rooms mix with see them, but I would go.

37

00:02:49.380 --> 00:02:54.900

Dusty Gedge: Because we know me so you can make it a bit local is that we just need us to.

38

00:02:56.550 --> 00:03:00.030

Dusty Gedge: georgie or wish.

39

00:03:05.760 --> 00:03:15.600

Dusty Gedge: George hw peak district instantly but carboniferous period so you've got what you've got is you've got cow carriers grasslands in the w peaks.

40

00:03:16.110 --> 00:03:18.810

Dusty Gedge: Okay, I think it's a combination.

41

00:03:21.270 --> 00:03:23.880

Dusty Gedge: yeah so you got limestone here, so this is a peak district.

42

00:03:23.970 --> 00:03:30.900

Dusty Gedge: You see this on a car, can you let me stop share it share again i'll send you a link to this.

43

00:03:33.840 --> 00:03:38.550

Dusty Gedge: So all right so part of the lines.

44

00:03:39.960 --> 00:03:40.740

Dusty Gedge: or limestone.

45

00:03:42.000 --> 00:03:45.960

Dusty Gedge: lunchtime creates carb carb count carries cross.

46

00:03:46.650 --> 00:03:54.240

Dusty Gedge: Which is actually what we use for green rooms in London and around the country, so you could say well you know we could select specific native plants that are.

47

00:03:55.680 --> 00:04:08.490

Dusty Gedge: Available relevance to the dub should peaks now darby should peaks I can't think anywhere in not nothing in sure that is curious, but there might be, I have to check.

48

00:04:12.330 --> 00:04:21.720

Dusty Gedge: I don't say nothing, well, I trust, is also a very, very interested in brownfields which, again I tend to be count carriers, so you can say well we're trying to replicate dobbs to.

49

00:04:22.590 --> 00:04:30.810

Dusty Gedge: pick district can carry his cross and then also brownfield habitat that has been is likely to be developed on in London.

50

00:04:33.270 --> 00:04:34.830

Dusty Gedge: cow carriers cross.

51

00:04:36.210 --> 00:04:37.020

Dusty Gedge: see if there was any.

52

00:04:38.550 --> 00:04:41.640

Dusty Gedge: Any pre Cana so, in other words.

53

00:04:42.780 --> 00:04:44.610

Dusty Gedge: there's nothing on the chip biodiversity.

54

00:04:45.810 --> 00:04:48.000

Dusty Gedge: So this is all good stuff to be our code, you know.

55

00:04:52.680 --> 00:04:54.420

Dusty Gedge: I think there must be something.

56

00:04:58.320 --> 00:05:04.890

Dusty Gedge: If you live in a limestone area i'm saying everything, so you just might have to giggle Google limestone areas and not sure.

57

00:05:05.910 --> 00:05:12.030

Dusty Gedge: I think not in of itself is on stand stand, because the caves in not a number sandstone case, I think.

58

00:05:13.410 --> 00:05:20.430

Dusty Gedge: That you know, but the scene, and you can do damage to peaks first thing that came up with the top two peaks can carriers.

59

00:05:21.780 --> 00:05:23.970

Dusty Gedge: Was check, let me check.

60

00:05:29.580 --> 00:05:30.390

Dusty Gedge: what's a typical.

61

00:05:31.800 --> 00:05:32.790

Ariyana Rayatt: tab.

62

00:05:35.100 --> 00:05:35.610

Dusty Gedge: let's check.

63

00:05:37.470 --> 00:05:39.480

Dusty Gedge: This let me go to the.

64

00:05:40.770 --> 00:05:52.320

Dusty Gedge: movie gone oh babies sorry the travelers you do this and I did go me is, and then I do this means that they will have different places, when you're tired well I don't think so.

65

00:05:53.550 --> 00:06:07.590

Dusty Gedge: I think that's that's I would do that in terms of great worlds again, you could use native plants use a lot of ferns if there are North West and East use a lot of native cow cameras plants again.

66

00:06:10.560 --> 00:06:19.290

Dusty Gedge: yeah so you know you can say in principle we'd like to use native ferns and native wildflowers.

67

00:06:19.980 --> 00:06:33.720

Dusty Gedge: With some some non native because green walls it's good to have a feudal natives in there, because you get more variety there there's not too many species in the UK that could go in agree wall, so you know that's not bad.

68

00:06:35.670 --> 00:06:41.130

Ariyana Rayatt: ] this is a substrate very with the plants or is almost.

69

00:06:41.760 --> 00:06:46.110

Dusty Gedge: up straight if you can get the the weight so let's work on 100 millimeters.

70

00:06:47.160 --> 00:06:48.090

Dusty Gedge: Which is.

71

00:06:49.530 --> 00:06:50.790

Dusty Gedge: 50 kg screaming.

72

00:06:51.900 --> 00:06:59.190

Dusty Gedge: At 26 yeah 50 cases about hundred millimeters if you get that up on that roof, you can.

73

00:07:00.540 --> 00:07:01.770

Dusty Gedge: get a car carriers.

74

00:07:03.600 --> 00:07:09.330

Dusty Gedge: What what they call account care species rich while phonics with no grasses.

75

00:07:10.020 --> 00:07:10.410

Okay.

76

00:07:11.910 --> 00:07:15.570

Dusty Gedge: Because it causes would come anyway in green walls.

77

00:07:16.710 --> 00:07:28.260

Dusty Gedge: It depends on the system some don't have substrate some to make some sense of just have topsoil blah blah blah so it's a bit more difficult to.

78

00:07:31.650 --> 00:07:33.210

Dusty Gedge: check any emails because they will find.

79

00:07:38.760 --> 00:07:46.110

Ariyana Rayatt: about substrate needs to be different in this.

80

00:07:48.720 --> 00:07:53.190

Ariyana Rayatt: case on the reefs, as well as the ground so, is it the same or is it different.

81

00:07:53.670 --> 00:07:54.060

know.

82

00:07:55.110 --> 00:07:58.920

Dusty Gedge: On the ground, you can use stuff.

83

00:08:00.570 --> 00:08:06.330

Dusty Gedge: Like ceramic waste and rubble and sand, but I lose you can't really do that.

84

00:08:07.110 --> 00:08:08.880

yeah.

85

00:08:09.600 --> 00:08:28.470

Dusty Gedge: And if you're not in them, you know you could then say, well, we would we would look to source any substrates used on the Ruse from born aggregate because they're based around knowing and born, I think it's good because it might be good for you to put this in this ball ball.

86

00:08:29.700 --> 00:08:34.350

Dusty Gedge: ball is it no it's Boston Boston called an aggregate bought an.

87

00:08:36.270 --> 00:08:37.710

Dusty Gedge: aggregate where they i'm sure they're.

88

00:08:39.030 --> 00:08:41.040

Dusty Gedge: Born aggregates born home.

89

00:08:43.020 --> 00:08:58.170

Dusty Gedge: Now they're in Northampton, which is the nearest one I can think, oh no, it is out for adverts there in there in book alpha aggregates let's do a call whoa he's a very in Stoke on Trent then they're stuck on track so that's the nearest substrates apply to you.

90

00:08:59.610 --> 00:09:03.630

Dusty Gedge: And also we're falling down falling down or somewhere near.

91

00:09:05.580 --> 00:09:11.340

Dusty Gedge: nursery Wolverhampton falling down in Wolverhampton so there the near is green roof sort of.

92

00:09:13.050 --> 00:09:17.070

Dusty Gedge: supplies the substrate and wildfires that I know of in in that part of the world.

93

00:09:18.330 --> 00:09:21.210

Dusty Gedge: So, can you say we want to go local there the nearest you know.

94

00:09:22.860 --> 00:09:25.800

Dusty Gedge: We know we've opted to not it's probably about 60 miles.

95

00:09:27.060 --> 00:09:28.470

Ariyana Rayatt: hmm .

96

00:09:29.730 --> 00:09:30.570

Ariyana Rayatt: i'm

97

00:09:35.670 --> 00:09:38.730

Dusty Gedge: It

98

00:09:44.220 --> 00:09:45.570

Dusty Gedge: it's 69 miles.

99

00:09:46.890 --> 00:09:58.650

Dusty Gedge: falling down little factor is probably actually yeah maybe a bit more practically Washington is probably the same so where we going to go.

100

00:10:00.900 --> 00:10:01.170

Dusty Gedge: out.

101

00:10:05.670 --> 00:10:06.990

Dusty Gedge: he's angry.

102

00:10:12.600 --> 00:10:12.990

Dusty Gedge: Very good.

103

00:10:20.550 --> 00:10:22.620

Ariyana Rayatt: yeah I that's all my questions.

104

00:10:23.760 --> 00:10:24.150

Ariyana Rayatt: say.

105

00:10:24.210 --> 00:10:28.170

Dusty Gedge: Thank you for the rain guards, if you go rain gardens.

106

00:10:29.220 --> 00:10:35.490

Dusty Gedge: Look go, not in a wildlife trust you know wetteland plants.

107

00:10:35.820 --> 00:10:45.030

Dusty Gedge: yeah that'd be associated to a new console want to do is get in the rain guards, we want to get emergent vegetation associated with the River trend.

108

00:10:45.960 --> 00:10:46.380

Okay.

109

00:10:47.730 --> 00:10:57.600

Dusty Gedge: Because you know and then there's you could also you know if you really want to impress you go the with the River trend and the attic is it at America she's done south.

110

00:10:58.680 --> 00:11:00.780

Dusty Gedge: lakes, which is a big nature's of yeah.

111

00:11:00.900 --> 00:11:01.080

that's.

112

00:11:02.400 --> 00:11:05.220

Dusty Gedge: yeah I think isn't equal DS and relax and.

113

00:11:06.390 --> 00:11:06.810

Ariyana Rayatt: Then yeah.

114

00:11:07.050 --> 00:11:12.360

Dusty Gedge: yeah so you know associated with nature reserve and you've also got a.

115

00:11:13.500 --> 00:11:20.310

Dusty Gedge: gravel pits to the to the east yeah what's that rowan courses call with country park.

The rest of the recording is not presented as it is not relevant to the project
